Re: Anthony Loughhead | Instinctive Driving

TO WHOM IT MAY CONCERN

I write this letter in support of Anthony (Tony) Loughhead as he seeks accreditation as an *Authorised Examiner Accreditation Class Car* in South Australia. I have known and worked with Tony for close to 10 years and have engaged his services with culturally and linguistically diverse (CALD) young people as well as young people with mobility and disability issues throughout that time.

Tony is a highly accomplished driving instructor and someone that I have regularly turned to when working with the aforementioned groups. I know that in Tony they have an instructor who will nurture not only their driving ability and confidence but do this in the context of holding road safety paramount. Our young learner drivers need instructors of Tony's calibre.

Tony's great strengths lie in not only his outstanding record as an instructor but in his proven ability to work with young people across a range of barriers and deliver results. There is a need to have high quality instructors who hold these values strongly and Tony's service provision with Instinctive Driving has always emphasised this.

I hope that Tony is considered and granted this accreditation because it will benefit future learner drivers with barriers to learn from him.

Kind regards,

E. Babister
